Öhringen, 06.07.2020

Declaration on the regulation EC no. 1907/2006 concerning the registration, evaluation, authorization and restriction of chemicals (REACH regulation)

Since June 1<sup>st</sup>, 2007, the European REACH regulation (registration, evaluation and authorization of chemicals) has been in force. REACH primarily affects manufacturers, importers and distributors of chemical products, but in certain cases companies as well that use chemical substances in the broadest sense.

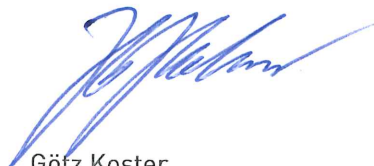

Durbal Metallwarenfabrik GmbH is a downstream user within the meaning of the EU regulation, because Durbal is neither a manufacturer nor importer or distributor of chemical products. The chemicals we use in our production (e.g. lubricants and greases) never reach the lower limit of 1 ton / year. Therefore we don't have to create technical dossiers according to the EU regulation.

According to our certifications, ISO 9001: 2015 and ISO 14001: 2015, we are in constant dialogue with our suppliers to make sure that all delivered products are REACH compliant.

For further questions please do not hesitate to contact our technical manager, Mr. Koster.
